

Mentoro's annual program addresses all financial risks and acts as a catalyst for behavior change.

At least
55%
of employees
expect to
delay their
retirement or
need to work
after they
retire to
make ends
meet.

> 70 PERCENT

72% of workers say they are distracted at work by their finances.

Top **3** Financial Priorities:

1. Evaluate Retirement Needs
2. Debt Reduction
3. Budget & Spending Help

Average Participant Score

69 / **100**

67%

Regularly spend more than they make.

More than half of workers are overwhelmed or moderately **stressed** about money

*The above data is sourced from a diverse Mentoro participant base of 1,000+ participants.

The working population is living in a state of financial stress. They're spending more, saving less and jeopardizing their financial health in the process. Offering this benefit is an opportunity to help in correcting a major crisis. Financial wellness embodies a meaningful approach to our understanding and the handling of our money. It does not require achievement of status or income. Because of this, **everyone has the capacity to be financially well.**

- Whitney Queen, Mentoro President
